## AIRCRAFT MAINTENANCE ENGINEER - STRUCTURES

**Job Location:** Ottawa, Ontario

This position reports to the Specialized Work Manager and Ottawa Maintenance Manager.

### Responsibilities of the Position

- Maintain the company aircraft as directed within the scope of license, capabilities, and authority granted in accordance with the MPM and CARs;
- Perform sheet metal, composite or other structural activities on various aircraft and components as required;
- Record all work done on appropriate forms and provide an ACA release as required;
- Supervise, mentor and train apprentices as required;
- Confer with the Maintenance Manager(s) to identify aircraft, shop and field issues and to discuss maintenance requirements and solutions;
- Understand, comply and promote all company policies and procedures including reporting of hazards and incidents encountered in daily operations;
- Maintain a positive attitude toward personal and professional growth;
- Assist in the activities carried out by the maintenance group;
- Maintain a safe and clean work environment; and
- Willing to travel domestic and internationally to perform repairs in the field.

### Qualifications and Experience

- Valid Transport Canada Aircraft Maintenance Engineer license type "S";
- Experience on C208 and DHC-6 aircraft a definite asset;
- Valid passport and driver's licence;
- Ability to obtain a Transport Canada restricted area pass;
- Excellent organization skills, ability to multitask and meet deadlines; and
- Available to work after hours occasionally as required.

Salary is commensurate with experience and qualifications.
