## AIRCRAFT AVIONICS “E” ENGINEER

**Job Location:**  
**Date Posted:**

Ottawa, Ontario  
February 19, 2016

### Position Summary

SGL is currently seeking an experienced Avionics Engineer to join its Aircraft Maintenance department based at the company's headquarters in Ottawa. The position requires occasional field work at locations around the world.

### Responsibilities of the Position

- Maintain the company aircraft to a high standard in accordance with the ACA privileges as per the MCM and MPM;
- Confer with the Maintenance Manager to ensure the aircraft are up-to-date and safe for flight;
- Assist as required to ensure the timely completion of company and customer regulatory audits;
- Ensure a safe working environment; and
- Maintain a positive attitude toward personal and professional growth.

### Qualifications and Experience

- Aircraft Maintenance Engineer with an “E” license;
- Experience on C208, DHC-6, BN2 or other GA aircraft a definite asset;
- Willingness to travel internationally for occasional field work;
- Knowledgeable understanding of Canadian aviation regulations;
- Valid passport and driver's license; and
- Ability to obtain Transport Canada restricted area pass.

Salary is commensurate with experience and qualifications.
